CO-OPERATIVE LEARNING INTERNSHIPS @SAP IRELAND

This is a fantastic opportunity for third level students to simultaneously combine academic studies and industry experience with the leading business software company SAP. This dual study program will kick start students' careers by giving them an opportunity to put their academic studies to immediate use in industry. In tandem they will be able to bring real industry insight back to their academic pursuits.

At SAP, mentors will help you grow both professionally and personally and can provide guidance concerning your career choice. You will benefit from innovative on-the-job-learning to shape the career you want. You will be exposed to a highly stimulating, international environment, where employees acquire knowledge and skills through instructor-led classes, e-learning courses, online books, virtual classrooms and online videos. Training addresses soft skills such as giving professional presentations and self-development techniques, as well as specialised topics that help students build functional and business expertise.

OUTSTANDING CAREER PROSPECTS

Co-Operative learning interns are provided with a wide range of technical and professional training. They are given the opportunity to apply their learning directly into practice in well structured intern phases. This will expose them to the many facets of SAP's business.

This program aims not just to kick start a student's career but to provide a solid foundation of professional development that they can call on throughout their working life. Upon completion of your degree you can consider employment in almost any area of SAP's operations. Graduates can also expect to secure demanding roles within our vibrant partner and customer ecosystems. Many graduates of the program will find their first ideal job in the areas of Software Development, Service & Support, Product Management and Consulting. More importantly they will discover the many, varied and well defined career paths offered by SAP globally.
